SUMMARY

Software Engineer with experience in backend development, distributed systems, and AI agents in production, progressing from Intern to Mid-level Developer. Skilled in TypeScript, Node.js/NestJS, React, PostgreSQL, Redis, and RabbitMQ, with hands-on experience building agents using LangGraph, GPT models, tool calling, and prompt engineering. .

PROFESSIONAL EXPERIENCE

Funcional Health Tech - Mid-level Full Stack Developer | Oct 2026 - Present

- Work on the full stack development of a web application, with a NestJS/TypeScript backend and a React frontend, delivering new features end to end and integrating the different layers of the system. .

Pedbot - Mid-level Full Stack Developer | Dec 2025 - Sep 2026

- Served as one of the lead developers of Maria, an AI sales agent deployed at the largest players in the pharmaceutical retail market, working daily with LLMs in production. Designed and evolved conversational flows with LangGraph and GPT models, implementing tool calling to integrate with clients' ERPs and guardrails to keep responses safe and aligned with business rules. Continuously refined prompts and flow logic based on the analysis of real conversations, while also contributing to architecture decisions, conducting code reviews, and optimizing critical APIs.

Pedbot - Junior Full Stack Developer | Aug 2024 - Dec 2025

- Built Maria's infrastructure with NestJS microservices, RabbitMQ, and Redis-based concurrency controls for high-volume distributed processing, along with RESTful APIs and integrations with client systems.

Pedbot - Software Development Intern | Feb 2024 - Aug 2024

- Implemented features with Express.js and React.js, fixed bugs, and developed integrations with external APIs

Brunnschweiler Latina - Apprentice, Monitoring | Feb 2022 - Dec 2023

- Supported project management and the tracking of operational KPIs.

FEATURED PROJECT - AI SALES AGENT (MARIA)

Project developed while working at Pedbot.

- AI sales agent that ran in production at the largest players in the pharmaceutical retail market, handling over 1,000 conversations per day with a conversion rate above 10% in paid orders. Worked on the project end to end: from designing flows with LangGraph, GPT models, tool calling, and guardrails, to building NestJS/RabbitMQ microservices with Redis concurrency controls for distributed processing, as well as continuously refining prompts and logic based on the analysis of real conversations.
-

TECHNICAL SKILLS

- **Languages:** TypeScript, Python, PHP, C#
 - **Backend:** Node.js, NestJS, Express, Laravel, REST, GraphQL
 - **Frontend:** React, Vue.js
 - **Data & Messaging:** PostgreSQL, MySQL, SQL Server, Redis, RabbitMQ
 - **Infrastructure & Architecture:** Docker, GCP, CI/CD, Git, SOLID, Microservices, Distributed Architecture
 - **AI:** LangGraph, LangChain, OpenAI API, LLM Agents, Prompt Engineering, Tool Calling
-

KEY CERTIFICATIONS & BADGES

- **LangChain Academy (2025):** Building Ambient Agents with LangGraph
 - **Google Cloud Skills Boost (2023):** Perform Foundational Data, ML, and AI Tasks in Google Cloud | Create and Manage Cloud Resources | Perform Foundational Infrastructure Tasks | Build and Secure Networks in Google Cloud
-

EDUCATION

Associate Degree in Systems Analysis and Development - Unimar - University of Marília | 2025

LANGUAGES

Portuguese: Native | English: Intermediate
